

UPS

Construction & Engineering

ABOUT US

UPS Construction is a professional construction company founded in 2018 and operating in Azerbaijan. Our main goal is to deliver durable and functional construction solutions that meet modern standards.

Our core activities are steel-structure construction and installation works, as well as the design and turnkey delivery of facilities for various purposes. UPS Construction has successfully completed numerous industrial, commercial and infrastructure projects in this field.

In addition, UPS Construction manufactures and supplies a number of building products that are an integral part of the construction process. This allows the company to control quality and to deliver projects more quickly and reliably.

Operating under the relevant licenses, our company works in full compliance with the current regulatory and technical requirements of the Republic of Azerbaijan. UPS Construction's service portfolio includes infrastructure works, laying of water supply and sewerage lines, fabrication and installation of steel structures, as well as drilling and engineering installation works.

OUR SERVICES

Turnkey project delivery

- Full-cycle construction of facilities for various purposes, from design to commissioning.

Steel-structure construction and installation

- Design and installation of frame and cladding systems for factories, warehouses, production sites, retail and industrial facilities.

Prefabricated containers and modular buildings

- Design and installation of container and modular buildings for office, residential and industrial use.

Infrastructure and utility networks

- Laying of water supply, sewerage, drainage, power and communication lines; drilling and installation works.

Manufacture and supply of building products

- Production and sale of sandwich panels, steel structure components, roofing and facade cladding.

Roofing and facade works

- Design and professional installation of durable, energy-efficient, highly insulated roof and facade systems for industrial and commercial facilities.

UPS

Construction & Engineering
